Education

SRM Institute of Science and Technology (SRMIST)

B.Tech in Computer Science

CGPA: 9.44/10

Aug 2024 – Present

Chennai, Tamil Nadu

Sunbeam English School Bhagwanpur

12th Grade (PCM + CS)

Percentage: 85%

March 2024

Varanasi, Uttar Pradesh

Experience

Elevate Labs

Web Developer Intern

Nov 2025 – Dec 2025

Virtual

- Delivered 20+ frontend tasks across e-commerce, dashboard, and landing page projects using React.js, HTML, and CSS.
- Reduced page load time and UI bugs by refactoring component structure and optimizing render logic across assigned projects.
- Built responsive, cross-device UI components; awarded **Best Performer** out of the intern cohort for output quality and delivery consistency.

GirlScript Summer of Code (GSSOC'25)

Open Source Contributor

Aug 2025

Virtual

- Submitted code fixes and feature improvements to an open-source repository, passing maintainer code review on all contributions.

Girls Who Code Summer Immersion Program

Participant

Summer 2023

Virtual

- Completed a 30-hour program covering programming fundamentals and Git-based version control; built interactive JavaScript applications in a team setting.

Projects

Qualyx | *Next.js, PostgreSQL, Supabase, Python, FastAPI*

Jan 2026 – Present

- Building an MVP LLM evaluation platform to track model performance across pre-training, fine-tuning, and production stages with CI/CD-based quality gates.
- Architected 4 modular pipeline components — Data Health Scanner, Training Pulse Monitor, Experiment Intelligence, and Eval Clarity Engine — for automated output scoring and failure clustering.
- Engineered backend with Supabase and PostgreSQL to manage users, experiments, and evaluation datasets across the full model lifecycle.

Complyt | *FastAPI, TypeScript, PostgreSQL, Docker, OpenAI API*

github.com/kuljot-kaur/Complyt

- Built an AI document compliance platform supporting PDF and image inputs; used OpenAI API for structured data extraction and automated compliance reporting.
- Eliminated duplicate processing via SHA-256 idempotent hashing; secured system with JWT authentication, bcrypt, and Fernet field-level PII encryption.
- Designed async backend with FastAPI, Celery, and Redis for low-latency task offloading; containerized with Docker for Kubernetes-ready horizontal scaling.

HireIQ | *React, FastAPI, Python, Groq, Supabase*

github.com/kuljot-kaur/HireIQ

- Built a hiring intelligence agent with semantic memory recall to surface candidate patterns, churn predictors, and role-specific interview probes across full hiring history.
- Designed a 3-screen React dashboard — Kanban pipeline, AI interview workspace, and intelligence panel — supporting up to 10 concurrent users with real-time pattern analysis.
- Generated AI pre-interview briefs by recalling similar historical candidate profiles and outcome signals, reducing manual recruiter prep time.

QuestBoard | *React, Firebase, Firestore, Tailwind CSS, Tone.js, Vite*

kanbanapp-omega.vercel.app

- Built a real-time collaborative Kanban board used by 10+ users across 15+ boards, with full CRUD, drag-and-drop, and priority filtering.
- Implemented a gamification system with XP, leveling, and Tone.js audio feedback; secured per-user data via Firebase Authentication and Firestore Security Rules.

BlogVerse | *React, Firebase, Tailwind CSS*

blogverse-alpha.vercel.app

- Built a multi-user blogging platform with a CLI-style terminal interface supporting full CRUD operations via structured commands.
- Implemented backend with Firebase Firestore and Authentication for real-time data sync and per-user access control.

Publication

Neuromorphic Edge Computing: A Survey of Brain-Inspired Architectures for Low-Power AI

Nov 2025

- Presented at ICECMSN 2025 — 5th International Conference on Evolutionary Computing & Mobile Sustainable Networks, Hindusthan Institute of Technology.

Technical Skills

Languages: Python, Java, C++, JavaScript, TypeScript, SQL

Frontend: React, Next.js, Tailwind CSS, HTML, CSS

Backend & Systems: FastAPI, REST APIs, Celery, Redis

Databases: PostgreSQL, MongoDB, Firebase Firestore, Supabase

DevOps & Tools: Docker, Git, GitHub, VS Code

Deployment: Vercel, Render, Railway

Positions of Responsibility

GitHub Community SRM

Tech Member

- Built and deployed the hackathon website used by 75+ participating teams; raised 5+ pull requests reviewed and merged by maintainers.

International Student Chapter (ISC)

Event Management Member

- Organised International Student Day for 200+ attendees, coordinating 25 volunteers across logistics, scheduling, and on-ground execution.

DSA Dance (JattSquad)

Member

Sep 2025 – Present

SRMIST, Chennai

Oct 2025 – Present

SRMIST, Chennai

Nov 2025 – Present

SRMIST, Chennai

Hackathons

HACKSTROM 2026 — Final Round Finalist | Deepfrog AI Solutions & Dept. of Computational Intelligence, SRMIST Apr 2026

Smart India Hackathon — Internal Edition | Directorate of Entrepreneurship & Innovation, SRMIST Sep 2025

Certifications

Programming In Java (NPTEL)

Data Base Management System (NPTEL)

Deloitte Australia Technology Job Simulation

CBSE Industry Engagement
